Privacy, Data Storage, and Use of Feedback

We respect your privacy and are committed to protecting your personal information in accordance with relevant privacy and data protection laws. All information you provide, including feedback from **EFT Tapping, and other exercises**, is securely stored and never shared with third parties. Brain Tapping Buddy (AI) Limited Time Bonus

The Brain Tapping Buddy is an AI-powered tool trained by Georgie Beames to help you create personalised tapping scripts. Your privacy is a top priority; all interactions with the Brain Tapping Buddy are confidential and securely stored. While your conversations are private, it is important to understand that this tool is an Artificial Intelligence — the information you share is processed by the AI to generate responses and personalise your scripts. Please be assured that this data is used solely for the purpose of your session and is not saved once you start a new chat; progress is only retained within a continuous conversation. It is crucial to remember the Buddy's role as a coaching tool — it will not provide crisis, clinical, or diagnostic advice. Like all AI, it may not always be perfect, so we encourage you to use your own judgment while engaging with it.

This tool is only available through the App, and you will have limited time access to it. It is not part of the full program and is not in the membership site.
